

Christiane Tureczek is a Swiss sculptor who mixes art with Nature.

Her bronze creations follow the forms of elements that can be found in everyday life but which speak to her in a particular way. Her imagination and her technique "animate", therefore, these objects of a new life.

From there is born the series of "Witches", a very central project in its corpus.

The artist also treats sculpture with a more classic approach, as seen in the magnificent "Pietà" with sleek and almost abstract lines.

A total approach to metal sculpture.

From 2019 Christiane Tureczek is represented by Monteoliveto Gallery.

- born 1968 in Klagenfurt/A
- artistic education with Al' Leu, sculptor and editor and Ueli Gantner, sculptor and Graphic designer, Zürich/CH
