

Sanne RASMUSSEN

born in 1960 in Denmark, she lives and works in Køge. The artist takes inspiration from her daily impressions and experiences and from her travels in the world, particularly inspired by life in the big contemporary cities where the portrait has a very special place in her repertoire. She works with oil on canvas, with a figurative expression focused on lights and shadows, an old classique painting technique with layers, with a contemporary and modern expression. *I have always had a great passion for art. Eight years ago, I had the opportunity to live the dream of working with and developing my art. At the same time, it gives me immense pleasure in life. For the past several years I have been on a number of courses and painting trips. In addition, I have received the manuduction of painter Daniel Goldenberg in his studio in Willemoesgade in Copenhagen and the Spektrum art school in Copenhagen. I find inspiration in everyday impressions and experiences.*
